

International Finance

Pr. Christophe M. BOUCHER*

* Head of Quantitative Research & Strategy within ABN AMRO Investment Solutions and Professor at Université Paris Ouest Nanterre La Défense; e-mail: cboucher@u-paris10.fr.

Course Objective

This course provides an overview of key and recent issues in international finance. It discusses the main stylized facts and the major puzzles and surveys selected current research topics in the field such as global imbalances, international risk sharing, the determination of real exchange rates and purchasing power parity; empirical models of nominal exchange rates. This course addresses several issues that concern both policymakers and private actors: how to explain the variations in exchange rates? Can we predict exchange rates? The various forms of financial crises and is it possible to predict? Are monetary policies truly independent even under flexible exchange rates? Do we face a currency war? What is the counterpart of the exorbitant privilege enjoyed by some countries in the international financial system? The course develops critical thinking and analytical ability of students by monitoring and analysing the international monetary and financial conditions.

Time: Friday 13:00-16:00 PM; **Location:** 302; **First day of the course:** 16th September 2016; **Length:** 7 seminars of three hours; **Exam:** Two-hour written test (25th November – 11h30 – Amphi G).

Grading:

Written test: 60 percent.

Presentation: 30 percent.

Class participation: 10 percent.

Class participants must present in class one report on an academic paper presented in the reading lists. If you prefer to select a paper outside the reading list, you need to check with me first. Each report should be approximately 15-20 slides. You have to summarize the main arguments of the paper in the context of the existing literature, highlight its contribution and outline any strengths or weaknesses.

Course Topics

Topic 1. The Foreign Exchange Rate Market and Stylised Facts

Topic 2. Six Major Puzzles

Topic 3. Explaining and Forecasting Exchange Rates

Topic 4. International Financial Crises

Topic 5. Financial Integration, Risk Sharing and Economic Development

Topic 6. Global Imbalances, Exorbitant Privilege/Duty and Last-Resort Insurers

Topic 7. Exchange Rate Regimes Monetary Independence: Dilemma not Dilemma?
